**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 04 December 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 04 December 2006 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Mukawa (5,598,391).

Regarding claim 1, Mukawa discloses an information recording apparatus (fig.1) , comprising:

Art Unit: 2621

a first portable electric power source (column 1, lines 58-68, column 14, lines 55-60)

a first detector circuit for detecting remaining capacity of said first electric power source (column 14, lines 55-60);

an external power source (19) terminal of a second electric power source, being connected to an outside (column 14, lines 55-60);

a second detector circuit (87) for detecting that the second electric power source is supplied to said external power source terminal column 14, lines 55-60);

a recording circuit (41, 67) for recording information on a removable optical medium (column 4 lines 25-30); and

a finalizing process circuit for executing finalizing process for said recording medium by recording information on the medium when the first detector detecting that the examining capacity of the first electric power supply to the value higher than a predetermined value wherein when either one of the remaining capacity of said first electric power source and voltage of said second electric power source is detected to be equal or higher than a predetermined value, in said first detector circuit and said second detector circuit, operation of finalizing process is started by said finalizing process circuit upon said optical medium (column 12, lines 60-68, column 14, lines 55 to column 15, line 30).

Further for claim 2, Mukawa further teaches a final process to the optical medium when both the voltages of both of first power source and the external

Art Unit: 2621

power source are higher than the predetermine value (column 14, lines 55 to column 15, line 30).

Method claims 12 and 13 correspond to apparatus claims 1 and 2. Therefore method claims 12 and 13 are rejected by the same reason as applied to apparatus claims 1 and 2.

Regarding claim 11, Mukawa further teaches the information recording apparatus is a portable type recording apparatus and the medium is a disc (Fig. 1).

#### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2621

5. Claim 10 rejected under 35 U.S.C. 103(a) as being unpatentable over Mukawa (5,598,391 in view of Tomikawa (6,744,465).

Regarding claim 10, Mukawa fail to teach that the information recording apparatus is a portable type recording apparatus integrated with a camera and the medium is a disc .

Tomikawa teaches a recording apparatus is a portable type integrated with a camera. It would have been obvious to one of ordinary skill in the art to use a recording apparatus integrated with a camera as taught by Tomikawa as an alternative to the recording apparatus of Mukawa for recording information .

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HUY T. NGUYEN whose telephone number is (571) 272-7378. The examiner can normally be reached on 8:30AM -6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on (571) 272-7950. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
